Fantastic to hear both of you are connected. Anjali, we will lean in wherever we can if there are real opportunities to make an impact on the ground immediately.

This is fantastic news! Really great to see such a sizable amount being announced! And you are working with my former employer - UNICEF who I love.

We are sorting out next steps from our end on collaboration and should have updates by tomorrow.

More soon!

Thank you, Ajit and great to meet you as well, Brian! I would love to connect the dots on your conversations across the USG so we can get on the same page and also give you a sense of what we are doing here at USAID. Have copied in my colleague Megan to help us find a time today or tomorrow based on your schedule.

Many thanks everyone!
Anjali

> Thank you Ajit, and hello Anjali—glad to be connected. We have been working through Andy Slavitt at the White House on a number of Covid related issues and plan to reach out this morning to offer support. Please let us know if there are any details that would help guide our efforts or if it makes sense to connect by phone this morning—this is a very high priority for us.

Thanks,

Brian

Brian, Anjali, a quick note to introduce the two of you.

Brian, Anjali is the Deputy Assistant Administrator for USAID-Asia and the Asia POC for COVID. She had reached out to me yesterday about efforts that she is involved in where USG is putting together a program to get medical grade tankers, oxygen plants and genome testing kits into India. She mentioned that they are looking for private sector support.

Anjali, Brian is Public Policy Director in the US team and in touch with the WH on the same efforts.

Maybe the dots are all getting connected but wanted to make sure both of you are in touch.

Anjali, as I mentioned, FB as a company is very open to making a contribution.

Hope this helps.

Ajit
